

Instructions - PPM condition

Instructions

(page 1 out of 5)

Welcome! In this survey, you will answer 8 questions on the COVID-19 pandemic.

The UK government issues COVID-19 guidance and passes regulations to control the pandemic.

This survey aims to collect data on people's behaviour to assess whether such guidelines are helpful.

In each question, we will ask you about your experience for certain situations related to the pandemic.

Instructions

(page 2 out of 5)

Here's an example on how questions will appear:

I may have stood less than 2 metres away from the person in front in a queue at least once in the last 7 days.

True False

☐☐

You may pick True or False depending on whether you have been in the situation described in the question.

Your pick will be submitted when you click

Submit

Instructions

(page 3 out of 5)

We ask the same questions every 7 days to a new group of at least 50 participants.

All participants are students who currently reside in the UK. The survey can be taken only once.

In all questions, you will see the percentage of people who picked each answer in the last survey, 7 days ago.

For example, if 65% of participants picked True and 35% picked False, the choices will appear as follows:

True
(picked by 65% last week)

False
(picked by 35% last week)

The following page will explain rewards.

We ask the same questions every 7 days to a new group of at least 50 participants.

All participants are students who currently reside in the UK. The survey can be taken only once.

In all questions, you will see the percentage of people who picked each answer in the last survey, 7 days ago.

For example, if 65% of participants picked True and 35% picked False, the choices will appear as follows:

True
(picked by 65% last week)

False
(picked by 35% last week)

The following page will explain rewards.

Instructions

(page 4 out of 5)

You will earn £0.75 for completing the survey.

In addition, you may earn bonus from each question.

Let's see how it works in the example question. Suppose you picked True, as shown below:

At the end of this survey, we calculate the percentage of participants other than you who picked each answer.

You start with £1 bonus. Your bonus increases if the answer you picked is more popular among others in this survey, compared to last week.

Suppose 80% of others picked True this week. Then, you win $80 - 65 = 15$ pence from this question.

Suppose 55% of others picked True this week instead. Then, you lose $65 - 55 = 10$ pence.

We sum your gains/losses over all questions. Your bonus is never negative and it can increase up to £2.

Your total reward is therefore between £0.75 and £2.75.

You will earn £0.75 for completing the survey.

In addition, you may earn bonus from each question.

Let's see how it works in the example question. Suppose you picked True, as shown below:

True (picked by 65% last week)
False (picked by 35% last week)

At the end of this survey, we calculate the percentage of participants other than you who picked each answer.

You start with £1 bonus. Your bonus increases if the answer you picked is more popular among others in this survey, compared to last week.

Suppose 80% of others picked True this week. Then, you win $80 - 65 = 15$ pence from this question.

Suppose 55% of others picked True this week instead. Then, you lose $65 - 55 = 10$ pence.

We sum your gains/losses over all questions. Your bonus is never negative and it can increase up to £2.

Your total reward is therefore between £0.75 and £2.75.

Instructions

(page 5 out of 5)

Note that your bonus depends on others' responses.

You earn a higher bonus if you picked answers that became more popular compared to the last survey, which covered the previous 7-day period.

Your own experience may help you guess how others respond.

In the example, say you recall staying too close in a queue at least once.

If keeping distance was more difficult in the last 7 days due to busier streets and shops, it is likely that other people experience the same.

Then, you might expect a higher percentage of True picks among others. In that case, picking True increases your bonus.

Remembering your own experiences more accurately can improve your bonus.
